

Anthony Vargas Arguedas

Computer Engineering Student | Data Engineering & Software Development

+506 7116-1255 | tonyvargas312@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Engineering student at ULACIT with a growing focus on Data Engineering, software development, and artificial intelligence. Hands-on experience with Python, SQL, relational databases, React-based applications, and AI/ML technologies through academic and personal projects. I enjoy designing practical systems, working with data, and learning through iterative development. Currently seeking opportunities to deepen my experience in data-intensive systems, backend technologies, and modern software engineering.

EDUCATION

Universidad Latinoamericana de Ciencia y Tecnología (ULACIT) — San José, Costa Rica

Bachelor's Degree in Computer Engineering — Expected December 2026

Relevant coursework: Object-Oriented Programming, Data Structures, Operating Systems, Databases, Software Engineering, Artificial Intelligence, Networking, and Software Quality Assurance.

Cloud Forest School — Monteverde, Costa Rica

High School Diploma — Graduated 2019

RELEVANT PROJECTS

Scam Detection AI Chatbot | *Artificial Intelligence / Machine Learning — 2026*

- Developing and training NLP models to identify user intent and classify potential digital scams using Python and DistilBERT.
- Working with Hugging Face Transformers, PyTorch, and Scikit-learn for model training, preprocessing, and evaluation.
- Evaluating performance with accuracy, precision, recall, F1-score, and confusion matrices while contributing to intent classification and pattern recognition.

Train Survival | *Personal Game Development Project — Ongoing*

- Developing a post-apocalyptic isometric survival and management game using Godot and GDScript.
- Designing modular train systems, enemy behaviors, resource management, combat mechanics, and base progression.
- Creating and integrating custom pixel-art assets with Aseprite while iteratively prototyping gameplay systems.

PROFESSIONAL EXPERIENCE

Technical Support Assistant | Concentrix

San José, Costa Rica | Aug 2020 – Jun 2023

- Provided technical support to clients, diagnosing and resolving hardware, software, and network issues.
- Trained and mentored new team members while collaborating with cross-functional teams to identify product issues and system bugs.
- Maintained customer satisfaction above 90% through clear communication and efficient issue resolution.

Customer Service Agent | Youwager

San José, Costa Rica | Aug 2019 – Feb 2020

- Handled customer inquiries, real-time user issues, CRM documentation, and financial operations in a high-volume environment.
- Managed more than 50 customer interactions per day while balancing live chat and service requests.

TECHNICAL SKILLS

Programming Languages

Data & Databases

AI & Machine Learning

Frameworks & Platforms

Development Tools

Game Development

Methodologies

Python, TypeScript, SQL, Java, HTML, CSS

PostgreSQL, MySQL, SQLite, Pandas

PyTorch, Hugging Face Transformers, Scikit-learn, Jupyter

React, React Native, Supabase, Flask

Git, GitHub, Docker, VS Code

Godot, GDScript, Aseprite

Agile Development, Scrum

LANGUAGES

Spanish: Native | English: Advanced (C1)

ADDITIONAL ACTIVITIES

- Active participation in software development and AI projects at ULACIT.
- Continuous self-learning in Data Engineering, AI, software development, and game development.
